Education

Gautam Buddha University | Greater Noida, Uttar Pradesh, India

Aug 2022 – Jun 2026

Bachelor of Technology in Computer Science

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Machine Learning, Natural Language Processing

Skills

Programming Languages: C++, Python, SQL

Frontend: React.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, REST API Design

Database & Cloud: MongoDB, SQL, ChromaDB

Tools & Platforms: Git, GitHub, Postman, Firebase, Google Sheets, Codex

Frameworks & Libraries: TensorFlow, PyTorch, NumPy, Pandas, LangChain, Hugging Face Transformers, Streamlit

AI/ML Techniques: Fine-tuning with custom data, Vector Embeddings, Natural Language Processing, Neural Network Optimization, Workflow Automation

Experience

AI Intern - Manipal Business Solution | Noida (Apr 2026 - Present)

- Automated business workflows with Python, APIs, and Google Sheets, cutting manual reporting effort by 90%.
- Analyzed operational datasets and developed KPI reports to generate insights for leadership and process optimization.
- Refined conversational AI workflows through prompt optimization, intent validation, and response evaluation, increasing answer accuracy by 25%.
- Trained task-specific models on labeled datasets, error diagnostics, and performance benchmarking to strengthen output quality.

Engineering Intern - Thales Group | Noida (Jun 2025 - Jul 2025)

- Designed and deployed a Generative AI platform with Google Gemini and OpenAI APIs, embedding LLM capabilities into enterprise NLP pipelines.
- Formulated prompt templates and tuned inference processes to increase LLM output relevance by 30%.
- Produced a demo-ready capstone with technical documentation and cross-functional feedback integration.
- Conducted data analysis and model fine-tuning with Python and TensorFlow, reducing processing latency by 25% and supporting production-scale deployment.

Full Stack Developer Intern - MI Matdar | Maharashtra (Feb 2025 - Apr 2025)

- Constructed a responsive frontend using React.js and Tailwind CSS, resolving UI/UX bugs and implementing lazy loading to optimize page load times.
- Built scalable backend REST APIs with Node.js and Express.js, boosting response time by 40%.
- Collaborated in an Agile 7-member team to deploy builds with Vercel and Netlify, maintaining 95% test coverage.
- Integrated MongoDB database with schema design and query optimization, handling user records while improving data retrieval efficiency by 35%.

Projects

StudyMate - GenAI Powered Study Assistant [LINK](#)

Tech Stack: Python, LangChain, Groq, Gradio, ChromaDB, Hugging Face

- Developed a document intelligence application with RAG, semantic search, embeddings, and ChromaDB for contextual PDF summarization and question answering.
- Tuned retrieval pipelines with LLM and Hugging Face models, enabling 40% faster document review.
- Reduced document review effort by 70%, helping students and professionals extract insights from lengthy PDFs.

AlphaCare - AI-Powered Healthcare Chatbot [LINK](#)

Tech Stack: Next.js, React.js, Node.js, Firebase, Tailwind CSS, Vapi API, Google Gemini, TypeScript

- Delivered a real-time healthcare assistant powered by Gemini, Vapi API, Firebase, and TypeScript for symptom screening and voice interaction.
- Directed backend and AI implementation with Google Gemini and Vapi API, increasing voice-based interaction flow by 45%.
- Implemented a voice-first interface and personalized feedback system, raising user engagement by 35%.

Notion - Course Selling Application [LINK](#)

Tech Stack: React.js, Node.js, MongoDB, Express, Tailwind CSS

- Engineered a secure course-selling platform with role-based dashboards and admin tools, completing 70% of core backend APIs and frontend modules while reducing API response time by 20%.
- Enabled 50+ instructors to monetize learning content and reach students in underserved areas, boosting access by 40%.
- Supported low-bandwidth access and JWT-authenticated sessions, achieving 98% test-case success across authentication flows.

Additional Information

Languages: English (Fluent), Hindi (Native)

Certifications: Google Cloud GenAI (Google Cloud), Advanced Software Engineering (Walmart USA - Forage), Deloitte Australia Technology (Forage), AWS Cloud Practitioner Essentials (AWS), Generative AI (HP Life), Postman

Awards/Activities: Led a team to the finals in 3+ hackathons and solved 150+ questions on LeetCode and GFG.

Volunteered at MotoGP Bharat 2023, supporting event and logistics coordination [LINK](#)
